Transmission and Distribution  
Conference and Exposition.

As the multibillion dollar upgrade of the nation's electrical infrastructure to a smart grid gains momentum, companies need to adopt common networking standards to develop highly secure infrastructures that better manage and reduce energy consumption. With expertise in the latest technologies and standards, Anixter can help you make informed decisions regarding your cabling infrastructure, security and industrial communication needs.

Visit Anixter's booth to learn more about:

- Perimeter security
- Power, control, communications and instrumentation cable and accessories
- Substation products
- Data center solutions
- Supply Chain Services.

**Stop by Anixter's booth and register for a chance to win a prize on Wednesday, April 21.**

### Questions?

Call Karen Grisham, Anixter's Event Coordinator, at 224-521-4181.

### Are you looking to implement smart grid solutions?

Attend Anixter's 2010 "The IP Connected Grid<sup>SM</sup>: The Future of the Intelligent Electric Power Network" seminars to learn how to put the "smart" into the smart grid and how to ensure it is sound and secure! Explore the latest products, technologies, and best practices for implementing a smart grid.
